“We want to reduce waste, increase re-use, increase recycling and provide effective, efficient and customer-focused waste services that demonstrate value for money.”

Our Strategic Objectives are:
• To reduce the quantity of waste produced by the borough.
• To minimise the amount of waste that goes to landfill through increased reuse, recycling, composting and energy recovery.
• To provide an excellent waste containment and collection service to residents and businesses.
• To ensure that the Council’s waste collection services are cost effective.
• To determine the best approach to reuse and recycling.
• To fully participate in the East London Waste Authority (ELWA), joint management of disposal and collection operations and the preparation for future contractual arrangements.
