What progress has London Borough of Barking and Dagenham made in the last year?

Improved service outcomes in corporate priorities have been achieved, some from a low base. Over 75 per cent of core service indicators have improved since 2002/03 but some services require further improvement to meet community expectations. Areas of particular public concern such as crime, clean streets and street repairs are being targeted through the Council's Local Partnership Service Agreement. The Council works well with its partners. There is recognition of the Borough's growing diverse communities and the Council is encouraging community inclusion through on-going major investment to further improve access, service quality and outcomes for the most vulnerable. The Council achieved corporate Investors In People accreditation during 2005. The established performance reporting culture has ensured a focus on areas of weakness and ambitious key strategic plans are supported by robust action plans. Processes to enhance improved value for money have been established but have not yet demonstrated significant improvements, but the Council is in a good position to continue their positive service improvement trend.

How London Borough of Barking and Dagenham is run

Corporate assessments carried out from 2005 onwards have changed. There is now a greater focus on leadership, partnership working, value for money and the achievement of local priorities. The scoring framework has also been revised and for this reason they are not directly comparable with corporate assessments in previous years. All councils will have the new-style corporate assessment by 2008, as part of a rolling programme of corporate assessments and joint area reviews. Until these have been completed the overall CPA category for a council that has a new-style corporate assessment will be based on either its new or the previous corporate assessment score, whichever is the higher.
