Title:	North East London Primary Care Strategy	
Open Report		For Information
Wards Affected: All		Key Decision: No
Report Author: Rehan Qureshi (Independent Consultant)		Contact Details: Tel: 07851288054 E-mail: rehan.qureshi2@nhs.net
Sponsor: Jane Lindo, North East London Primary Care Director Sarah See, Barking & Dagenham, Havering & Redbridge Primary Care Transformation Director		
Summary: <p>A Sustainability and Transformation Partnership (STP) Primary Care Strategy is a key requirement under NHS Long Term Plan and the final strategy has been submitted to NHS England on 30 June 2019.</p> <p>The attached strategy is based on seven existing North East London (NEL) primary care strategies and NHS Long Term Plan (LTP) requirements. It has been extensively discussed with the stakeholders across the system and care has been taken to clearly define where this strategy sits within our STP, regional and national context and how it links with other enabler programmes such as digital, estates and integrated care.</p> <p>The strategy outlines the primary care transformation programme in three key work streams (Quality & Efficiency, New Models and Workforce), our challenges and how we plan to achieve our vision. Furthermore, it outlines 15 aspirations in addition to NHS LTP requirements to be delivered by 2021 across NEL.</p> <p>The strategy has been approved by all seven CCG's governing bodies.</p>		
Recommendation(s) The Board is asked to note the report.		
Reason(s) The strategy is based around our fundamental principle of placed based care across North-East London.		

1. Introduction and Background

- 1.1 The purpose of this report is to introduce the North East London (NEL) Primary Care Strategy and its delivery requirements within local and national context.
- 1.2 The NHS Long Term Plan (LTP) was published on 7 January 2019 and outlined an STP primary care strategy as a key requirement. The draft strategy and appendices

(attached) was developed with key stakeholders across the system and incorporate all seven primary care strategies across NEL.

2. Proposal and Issues

2.1 Not applicable

3 Consultation

The strategy is based on existing strategies across north east London, which had been developed via local stakeholders' engagement, including local authorities.

4 Mandatory Implications

4.1 Joint Strategic Needs Assessment

The strategy provides a strategic direction for consistent development of primary care across north east London to enable each place to deliver their local priorities.

4.2 Health and Wellbeing Strategy

The strategy emphasises on reducing health inequalities across NEL through a dedicated quality improvement work stream across the system. It is developed around the fundamental principle of placed based care across NEL to ensure primary care is at the centre of local communities, building relationships and partnerships with health and care providers and the voluntary sector. Early diagnosis and intervention for cardiovascular disease is supported through national Directed Enhanced Service, starting in April 2020.

4.3 Integration

The primary care development as outlined in the strategy will provide the platform for sustainable partnerships among local stakeholders to deliver place-based person-centred care with multi-disciplinary teams at the heart of this approach. This also sets the localities up for multiple levels of integration (from clinical to system).

4.4 Financial Implications

Not applicable

4.5 Legal Implications

Not applicable
