| Abbeyfield East London Extra Care Society Limited | The Abbeyfield East London Extra Care Society Limited | http://www.cqc.org.uk/dir ectory/1-112951275 | Social Care Org | Inspection Report published 11 October 2014 | 21-Jul-14 | 3 out of 5 standards met | Action needed: - Safeguarding people who use services from abuse - Cleanliness and infection control - Assessing and monitoring the quality of service provision There were sixty staff working in the home, however two thirds had not completed safeguarding training. This meant staff were unable to identify the different types of abuse and respond appropriately to safeguarding concerns. It was also noted that two thirds had not completed infection control training. Staff were unable to identify the different types of infection and respond appropriately to infection control precautions to minimise cross-infection. The provider carried out an annual satisfaction survey but did not evaluate the responses. The provider did not have procedures in place to assess and monitor the quality of service provided to people living in George Brooker House. This meant there were no means of assessing the quality of the service provided. |

| Bupa Care Homes (CFHCare) Limited | Chaseview Residential and Nursing Home | http://www.cqc.org.uk/dir ectory/1-127503453 | Social Care Org | Inspection Report published 05 December 2014 | 04-Aug-14 05-Aug-14 07-Aug-14 14-Aug-14 | 4 out of 5 standards met | Enforcement action taken: Management of medicines Action needed: Safety, availability and suitability of equipment CQC have taken enforcement action against Chaseview Residential and Nursing Home to protect the health, safety and welfare of people using this service. There were a number of issues with medicine management which included unclear administration guidelines. In one of the units CQC found the clinical room had cupboards which were over full with dressings, creams and stock items. The shelving and storage units were in poor condition and the controlled medicines cabinet was full and cramped. This meant it was difficult for staff to locate items as needed and to ensure stock was rotated according to expiry dates. CQC also found a total of sixteen medicine issues which included not writing explanations for why medicines were not administered and not putting an opening date on liquid medicine. CQC also found from an audit check conducted by the contractor on 27/09/2013 and by the home on 28/07/2014 that some bed rail bumpers posed a health and safety risk because they were not using the correct types. |
