Subject: Ship & Shovel licence variation.

Dear Mr Sandhu,

In the operating schedule for your variation application you make reference under the objectives of the prevention of crime and disorder, and the protection of children from harm, of the use of an ID scanner.

This is welcome, however because conditions derived from an operating schedule need to be enforceable it is not enough just to reference the use of such equipment.

I am making a representation about the application, I seek to include the following as conditions, based on your use of an ID scanner:

The premises shall adopt a club ID scan or a suitable equivalent which shall be utilised as part of the conditions of entry after 21:00 on any day where SIA door supervisors are engaged.

Patrons seeking to enter will be subject to the entry process whereby a photograph may be taken, fingerprints may be taken. Documentation will be required to enable identification to take place.

The scanning device shall be capable of reading passports, ID cards and PASS cards.

The Id scanner data should be provided to police and responsible authorities on request.

Please reply indicating whether or not you accept these conditions. If you so I shall withdraw my representation and these will become conditions attached to any new licence issued.
