Proposed Outsourcing of Frontline Services

The hundreds of frontline staff who this outsourcing proposal concerns, have desperately wanted to get on the internet to tell you how they feel. Unfortunately due to their workload they are unable to do this.

Therefore on behalf of all GMB members we are registering their anger and disbelief that a Labour run local Authority would even consider agreeing to these proposals.

This whole process (or lack of) has been dealt with in an underhand way. We are appalled at the manner in which you have pushed this through without any consultation. These documents were put on line for the general public to see before either unions or members of staff directly involved had been notified. In the past our consultations have been meaningful and transparent, up until now.

We now expect any future consultations to be meaningful and a two way procedure.

Penny Robinson
